

Introduction to Cross Wrap Designs Cross Wrap 21

A is going up the rod, B is coming down the rod. This is an example of color choices and this is called a horizontal split center diamond. To build this design, use color 1 going up to the right and coming down to the left. Color 2 goes up the rod to the left and comes down to the right.

This is called a vertical split diamond. Color 1 goes up and down the rod to the right and color 2 goes up and down the rod to the left. The vertical and horizontal splits will be used many times when we get into the larger designs.

Take home lesson: many designs can be created by changing the position of the colors.
