

Multiple Thread Wraps 18

This pattern is also a variation of the 8-point star, with the main difference being the use of three different colors.

This pattern is made with a 12 sequence pass including:

Wrap the centerline thread OUT both ways with red.

Wrap the outer box threads IN with yellow and OUT with green.

Wrap with single threads for the straight lines inside the pattern box.

Black was added for frame effect and can be varied within the design.

Note the 8-points of the star in red, but also the cross, formed by the yellow.

Note the black separated the whole pattern into 9 diamonds. A solid red in the center, 4-way split diamonds of red, green & yellow and 2-way split diamonds of yellow and green (both vertical and horizontal split).

This shows how this pattern is built from the simultaneous wrapping of these nine diamonds.

This is a good example of building patterns from the basic chevrons & diamonds.
