

Multiple Thread Wraps 22

This is another example of a double box layout pattern.

The dark blue wraps IN with a plus-1 method from both side of the inner box.
The green wraps OUT from the inner box and IN from the outer box one thread at a time.
The dark blue wraps OUT from the outer box in a plus-1 method.

In this example there are numbers on each side of the layout threads. This is to help identify the order of the steps to be done on each pass.

Since there are 16 wrapping steps on each pass around this pattern it is really helpful to list the steps and check them off as they are completed. Also keep in mind that you will be increasing 8 of these steps by one thread each pass. Keeping track of the steps and the passes you are working on will be beneficial to you if the phone rings or you need a nature break.
