

RodCrafter Journal Storage

by Buddy Tison

Custom Rod Builders Guild

If you are tired of trying to find a certain RCJ and have been fighting the storage and organization problem, this is the solution that worked for me.

Magazine files from the office supply store were cut down to fit the pamphlet size of the old RCJ. Made some labels that may be cut and pasted to the front of the boxes that cover the various years of publication. Some years had six issues and some four. Made the labels for what the files would hold without being crowded. The labels are included so you can print them for your use if you want to try this. Used Banker Box - Fellows 07222
